**7.9 BILLION POUNDS OF COPPER
1.3 MILLION OUNCES OF GOLD**

NEVADA COPPER

The Corporation owns 100% of the Pumpkin Hollow Copper Development Property in the Walker Lane mineralized belt of Western Nevada. Pumpkin Hollow is an advanced development stage copper property, which contains Measured and Indicated Resources totaling 4 Billion pounds of Copper plus additional Inferred Resources of 3.9 Billion pounds of Copper (all using a 0.2% copper cutoff grade). This 7.9 Billion pound copper resource and associated 144 million ton iron, 1.3 million ounces of gold and 57 million ounces of silver was estimated in October, 2007.

A recently completed 62,000 foot drilling program combined with historical work at the Pumpkin Hollow property including over 590,000 feet of drilling conducted by U.S. Steel Corp. and Cyprus Minerals Corp. among others formed the basis for this independent resource estimate. Collection of metallurgical, environmental, hydrological and geotechnical baseline data for developing the project is well advanced.

The Company intends to move the property forward through feasibility, and is confident that at current metals prices, the Pumpkin Hollow Copper property will soon host Nevada's Next Copper Mine.

COPPER - GOLD - SILVER RESOURCE

Copper % Cutoff	Tons (thousands)	Copper % Grade	Lbs Copper (thousands)	Gold (ounces)	Silver (ounces)
Measured And Indicated Resources
