

NEVADA COPPER

NEVADA'S NEXT MAJOR COPPER MINE

DEVELOPING THE PUMPKIN HOLLOW COPPER DEPOSIT

- 1 Pumpkin Hollow is an advanced development stage copper property with Measured, Indicated and Inferred Resources totalling 9.3 Billion pounds of Copper at a 0.2% cutoff grade (NI 43-101 Compliant).
- 2 The copper resource includes 1.45 million ounces of Gold, 55 million ounces Silver.
- 3 An iron resource (20% cutoff) of 361 tons at an average grade of 35.8% Fe for 129 million tons of iron.
- 4 Robust Preliminary Economic Assessment results completed March, 2008 - \$784 million NPV at an 8% discount and a 24% IRR - \$1.75 long term copper price.
- 5 100% owned greenfields project on 22 square mile land package. 98% of resource on patented (private) land.
- 6 Premier development site. Infrastructure rich location in a pro-mining environment.

**9.3 BILLION POUNDS OF COPPER
1.45 MILLION OUNCES OF GOLD**

NEVADA COPPER

Above: Drilling High Grade East Deposit - 2008

The Corporation owns 100% of the Pumpkin Hollow Copper Development Property in the Walker Lane mineralized belt of Western Nevada. Pumpkin Hollow is an advanced development stage copper property which contains Measured and Indicated Resources totaling 5.6 Billion pounds of Copper plus additional inferred Resources of 3.7 Billion pounds of Copper (all using a 0.2% copper cutoff grade). This 9.3 Billion pound copper resource and associated 1.45 million ounces of gold and 55 million ounces of silver was estimated in July, 2009. This independent resource estimate is based on 530 drill holes containing over 730,000 feet of core and rotary drilling, consisting of 140,000 feet by Nevada Copper and 590,000 feet of drilling conducted by U.S. Steel Corp. and Cyprus Minerals Corp. among others.

A Preliminary Economic Assessment (PEA) completed in March, 2008 concluded that at a long term copper price of \$1.75 the project would return a robust \$784 million NPV at an 8% discount and a 24% IRR. Tetra Tech MM Inc. an industry leading international engineering firm completed the PEA, envisioning a 60,000 tpd open pit/underground mining operation feeding a single concentrator over a 24 year mine life. Average annual production over the first 10 years of mine life is estimated at 113 thousand payable tons of copper.

Leveraging off what was learned with the PEA study, the company is resolutely executing a development program in 2009/2010 including hydrological, geotechnical and resource drilling, engineering optimization studies, permitting and advanced metallurgical testwork.

The Company intends to responsibly and aggressively move the property forward through feasibility and permitting, with the goal of commencing production in 2013.

MANAGEMENT

Giulio T. Bonifacio *President and CEO*

Mr. Bonifacio is a professional accountant with over 25 years of experience in senior executive positions in the mining industry. Mr. Bonifacio has been instrumental in several equity and project related financings and has an impressive track record raising capital for projects of merit.

Joe Kircher *Vice President and COO*

Mr. Kircher is a mining engineer with over 25 years experience building and operating mines in North America in senior executive positions with both senior and junior mining companies.

Joe Chan *Chief Financial Officer*

Mr. Chan is a professional accountant with over 25 years of accounting, administration and system experience in the mining industry, including 10 years in various positions with Teck Cominco.

Greg French *Project Manager*

Mr. French is a geologist with over 25 years exploration experience. He has a Nevada gold discovery to his credit and extensive project development experience.

IRON RESOURCE
