

NEVADA COPPER CORP.

QUARTERLY REPORT FOR THE THREE MONTHS ENDED SEPTEMBER 30, 2010

NEVADA COPPER CORP.

Management's Discussion & Analysis

For the three months ended September 2010, as of November 8, 2010

General

This Management's Discussion and Analysis of Nevada Copper Corp. (the "Corporation", or "Nevada Copper") has been prepared by management as of November 8, 2010 and should be read in conjunction with the Corporation's audited annual financial statements and related notes for the year ended June 30, 2010 and the unaudited consolidated financial statements of the Corporation for the three months ended September 2010 and 2009. All amounts are expressed in Canadian Dollars unless otherwise indicated.

Forward-Looking Statements

Certain statements contained in the following Management's Discussion and Analysis may be deemed forward-looking statements. All statements other than statements of historical facts, including the likelihood of commercial mining and possible future financings are forward-looking statements. Although the Corporation believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward-looking statements include unsuccessful exploration results, changes in commodity prices, changes in the availability of funding for mineral exploration, unanticipated changes in key management personnel and general economic conditions. Mining is an inherently risky business. Accordingly the actual events may differ materially from those projected in the forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date the statements were made, and readers are advised to consider such forward-looking statements while considering the risks set forth below.

Description of Business

Nevada Copper Corp. (the "Corporation" or "Nevada Copper"), is a development stage mining company engaged in the exploration and development of copper projects.

Nevada Copper was incorporated on June 16, 1999 under the Business Corporations Act of the Yukon as African Venture Corporation and changed its name to Astron Resources Corporation on July 26, 1999, and subsequently to Nevada Copper Corp. on November 16, 2006. The Corporation's common shares are listed on the Toronto Stock Exchange ("TSX") under the NCU symbol.

The principal asset of the Corporation is a 100% interest in the Pumpkin Hollow property located in north-western Nevada, approximately one hundred miles southeast of Reno. The property is located within a contiguous 22 square mile land package held by the Corporation comprised of patented and unpatented claims.

Overview of Performance

Since the acquisition of 607792 BC on August 15, 2006, the Corporation has embarked on a systematic fast-track program to develop its advanced stage Pumpkin Hollow property located in Nevada. During 2007, a 19,000 meters drill program was completed and in November 2007 the Corporation completed an updated independent National Instrument ("NI") 43-101 compliant resource estimate with copper and iron resources increased while adding gold and silver to the overall resource. On March 17, 2008 the Corporation completed a 43-101 compliant Preliminary Economic Assessment (the "PEA") of its Pumpkin Hollow property. The PEA was filed on SEDAR on April 3, 2008.

The Corporation completed the 2008 drilling program which totaled over 26,000 meters of resource, geotechnical and hydrological drilling and 16,000 meters of re-assaying the historic drill core.

An updated NI 43-101 compliant resource estimate was completed in July 2009 adding significant copper, gold and iron resources and showing substantial increase in the Measured and Indicated categories. As a result of the significant increases in the updated resource estimate, the Corporation updated its PEA in December, 2009 with largely reduced capital costs and a project which would be resilient to lower copper prices while still allowing for

the transition to the large integrated open pit-underground operation. The updated PEA was filed on SEDAR on January 13, 2010. Capital costs have been reduced to approximately 25% of that required for a larger 60,000 tons per day integrated open pit-underground operation. More importantly, the High Grade Case does not compromise the integrity of the large open pit project envisioned in the 2008 PEA, and will allow for transition to the large integrated open pit underground operation on a staged basis.

During December, 2009 the Corporation announced the commencement of a Pre-Feasibility Study. The Pre-Feasibility Study includes a 45,000 meter resource drilling program which was expanded from approximately 25,000 meters and is scheduled for completion in the fourth quarter of 2010. Snowden Mining Industry Consultants, Inc., an international industry leading engineering firm has been engaged by the Corporation to prepare the National Instrument 43-101 compliant report.

Selected Information

The following table sets forth selected consolidated annual financial information of the Corporation for and as of the end of the last three fiscal years. The selected consolidated financial information should be read in conjunction with the Consolidated Financial Statements of the Corporation.

	Three months ended		Year ended June 30,		
	September 30,		2010	2009	2008
	2010	2009	2010	2009	2008
	\$	\$	\$	\$	\$
Net (loss)	(365,536)	(234,307)	(4,364,555)	(2,589,017)	(2,575,910)
Net loss per share	(0.01)	(0.01)	(0.01)	(0.06)	(0.07)
Total cash and cash equivalents	23,342,126	1,540,983	25,253,454	2,567,280	6,307,602
Working capital	19,843,013	1,421,000	22,069,402	2,263,278	5,704,453
Total liabilities	3,665,589	2,193,459	3,254,638	2,526,143	660,689
Total assets	55,225,580	20,605,460	53,771,885	21,172,451	20,497,696
Shareholders' equity	51,559,991	18,412,001	50,517,247	18,646,308	19,837,007

Results of Operations

For the three months ended September 30, 2010, the Corporation had a net loss of \$365,536 or \$0.01 per share compared to a net loss of \$234,307 or \$0.01 per share with the corresponding period of 2009. General administrative expenses totalled \$405,916 (2009 - \$226,556) and business development totalled \$48,853 (2009 - \$5,207) reflecting changes in business activities during the current period. A total of \$3,269,133 (2009 - \$445,609) was spent in property acquisition and exploration related activities. Short-term investments generated interest income totalled \$96,107 (2009 - nil) for the current period.

Summary of Quarterly Results

Selected consolidated financial information for the most recent eight financial quarters is as follows:

(In thousands of dollars except amounts per share)	2010				2009			2008
	Sept. 30	Jun. 30	Mar. 31	Dec.31	Sept. 30	Jun. 30	Mar. 31	Dec. 31
	\$	\$	\$	\$	\$	\$	\$	\$
Cash	23,342	25,253	7,654	11,190	1,541	2,567	1,220	1,984
Working capital	19,843	22,069	3,973	10,756	1,421	2,263	753	2,543
Total assets	55,225	53,772	32,578	31,722	20,605	21,172	19,334	20,044
Shareholder's equity	51,560	50,517	28,847	29,220	18,412	18,646	18,823	19,670
Net loss	(366)	(2,189)	(1,621)	(320)	(234)	(1,303)	(842)	(134)
Net loss per share	(0.01)	(0.10)	(0.04)	(0.01)	(0.01)	(0.03)	(0.02)	(0.00)

Liquidity and Capital Resources

The Corporation's working capital as at September 30, 2010 was \$19,843,013 compared with a working capital position of \$1,421,000 as at September 30, 2009. During the current period funding of \$1,408,280 was received from the exercise of stock options and warrants (2009 – nil). Exploration expenditures for this period totalled to \$3,269,133 (2009 - \$445,609) at the Pumpkin Hollow project and funding to support operating activities was \$338,287 (2009 – \$565,144) and was further reduced by net change in working capital totalling \$287,812.

In June, 2009 the Corporation successfully closed an US\$2,000,000 convertible debenture agreement with Zhongtiaoshan Non-ferrous Metals Group Co. (“ZTS”). The convertible debenture will mature on December 25, 2010 and bear interest at a rate of 7% per annum calculated monthly and payable in full on maturity. The debenture is convertible into common shares at a deemed price of CDN\$1.00. As part of the agreement, ZTS also received from the Corporation 100,000 share purchase warrants exercisable at a purchase price of CDN\$1.00 per share until January 6, 2011.

On November 3, 2009 the Corporation entered into an investment agreement (the “Agreement”) with Capstone Mining Corp. (“Capstone”) whereby the Corporation issued 4,500,000 units at a price of \$2.50 per unit for gross proceeds of \$11,250,000. Each unit consisted of one common share and one-half of a transferable common share purchase warrant. Each whole warrant is exercisable into one common share at an exercise price of \$3.00 per common share until November 3, 2011. The corporation has the option to force a conversion within 30 days of a written notice if at any time prior to November 3, 2011, the closing price of the Corporation's common shares is greater than \$3.50 for at least 20 consecutive trading days. All securities issued in connection with this financing were subject to a four month hold period expiring March 4, 2010. Share issuance costs totaling \$93,344 were incurred in connection with the financing. No fair value was assigned to warrants attached to the units.

In connection with the Agreement, the Corporation granted Capstone a pre-emptive right to participate in any future share offerings by the Corporation so that Capstone can maintain its ownership percentage of the Corporation as long as Capstone's ownership interest in the Corporation is above 9%. Exercise of the pre-emptive right is subject to regulatory approval at the time of exercise.

Pursuant to the Agreement, if Capstone maintains an ownership interest in the Corporation of 19% or higher, Capstone will be entitled to nominate a representative to the Board of Directors of the Corporation. In addition, Capstone has agreed not to increase its ownership interest in the Corporation beyond 20% without the prior consent of the Board of Directors of the Corporation.

On April 27, 2010, the Corporation closed a bought-deal private placement whereby 7,762,500 common shares of the Corporation were issued at a price of \$3.05 per share for gross proceeds of \$23,675,625. All securities issued in connection with the offering were subject to a four month hold period expiring August 28, 2010. Professional and regulatory fees totalling \$343,505 were incurred in connection with the financing. The Corporation paid \$1,420,538 cash and issued 465,750 share purchase warrants to an agent as commission. Each warrant is exercisable into one common share of the Corporation at a price of \$3.30 per share until April 27, 2012.

Transactions with Related Parties

The Corporation shares certain premises and facilities with a company which has certain directors in common, under a cost sharing agreement. During the three months ended September 30, 2010, the Corporation incurred expenses of \$40,500 (2009 - \$34,500).

The Corporation entered into management agreements with certain members of senior management. In the event that there is a change of control, the Corporation is committed to pay severance payments equivalent of up to three years of salary.

Related party transactions are recorded at the amount paid or received as established by contract or as agreed upon by the Corporation and the related party.

Commitments

The Corporation entered into an Option Agreement to acquire a ten-year lease for mining rights (the "Lease"), effective May 4, 2006 and expiring May 4, 2016, to the Pumpkin Hollow Copper Development Property.

Under the terms of the Lease, the Corporation is required to make the following lease payments:

<u>Due Date</u>	<u>US\$</u>	
May 4, 2007	75,000	(Paid)
May 4, 2008	100,000	(Paid)
May 4, 2009	125,000	(Paid)
May 4, 2010	150,000	(Paid)
May 4, 2011	150,000	
	<u>600,000</u>	

Following May 4, 2011, the Corporation is required to pay advance royalty payments of US\$600,000 annually until the expiry of the Lease on May 4, 2016. Total advance royalty payments under this obligation are US\$3,000,000.

The Corporation is obligated to make exploration and development expenditures on the Property of at least US\$4,000,000 during the first three years of the Lease, with expenditures of at least US\$500,000 each year, and an additional US\$4,000,000 during the 4th through 6th years of the Lease, with expenditures of at least US\$500,000 each year. During 2008 the Corporation satisfied this obligation.

Pursuant to the First Amendment to Lease Agreement to the Lease dated April 10, 2008, the Corporation agreed to acquire from the optionor of the Lease, certain water rights to consume a maximum of 724 acre feet of water for its mining operations on the Property in exchange for making 80 quarterly payments payable over a period of 20 years with US\$47,262 each from July 1, 2008 to April 1, 2028. At June 30, 2010, payments totaling US\$378,099 had been paid. The first Amendment to the Lease Agreement also contains provisions allowing the Corporation to accelerate and reduce the payments required.

In August of 2009, the Corporation entered into an agreement with the City of Yerington, Nevada to reserve 2,000 acre feet of water for a term of 30 years. As consideration the Corporation will pay to the City of Yerington annual reservation fees of \$50,000 which revert to user fees based on usage at \$100 per acre foot for year 1 to year 15; \$125 for year 16 to 20; \$150 for year 21 to 25; and \$175 per acre foot for year 26 to year 30.

The Corporation entered into management agreements with certain members of senior management. In the event that there is a change of control, the Corporation is committed to pay severance payments equivalent of one to three years of salary.

Off-Balance Sheet Arrangements

The Corporation has no off-balance sheet arrangement.

Internal Controls over Financial Reporting

The Chief Executive Officer and Chief Financial Officer have instituted a system of controls for the Corporation to provide reasonable assurance as to the reliability of the financial information and that the financial statements are prepared, for external purpose, in accordance with GAAP. The limited number of employees within the Corporation facilitates access to real time information about developments in the business for the person responsible for drafting disclosure documents. All documents are circulated to responsible members of management and the board of directors according to the disclosure time-lines contained within the disclosure policy. The disclosure controls conform with the Corporation's Corporate Governance policies.

The Chief Executive Officer and Chief Financial Officer, after evaluating the effectiveness of the Corporation's disclosure controls and procedures have concluded that, as of such date, the Corporation's disclosure controls and procedures were effective to ensure that material information relating to the Corporation was made known to them by others within the Corporation during the period.

Disclosure Controls and Procedures

Disclosure controls and procedures are designed to ensure that information required to be disclosed by our Corporation is recorded, processed, summarized and reported within the time periods specified. The Chief Executive Officer and the Chief Financial Officer are responsible for establishing and maintaining disclosure controls and procedures for the Corporation.

The Chief Executive Officer and the Chief Financial Officer have concluded, based on an evaluation as of September 30, 2010, that the disclosure controls and procedures for the Corporation was effective to provide reasonable assurance that material information related to the Corporation is made known. It should be noted that while the Corporation's Chief Executive Officer and the Chief Financial Officer believe that the Corporation's disclosure controls and procedures provide a reasonable level of assurance that the system of internal control are effective, they do not guarantee that the disclosure controls and procedures will prevent all errors and fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met.

Critical Accounting Estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingencies at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates. Significant areas requiring the use of management estimates relate to the determination of the recoverability of mineral property deferred costs, valuation of investments, future income tax assets and liabilities, assumptions used in valuing options and warrants in stock-based compensation calculations and assumptions used in valuing the liability and variable conversion feature of convertible debenture.

Risk Factors

Mineral exploration is a speculative business, characterized by a number of significant risks including, among other things, unprofitable efforts resulting not only from the failure to discover mineral deposits but from finding mineral deposits which, though present, are insufficient in quantity and quality to return a profit from production. The marketability of minerals acquired or discovered by the Corporation may be affected by numerous factors which are beyond the control of the Corporation and which cannot be accurately predicted, such as market fluctuations, the proximity and capacity of mining facilities, mineral markets and processing equipment, and such other factors as government regulations, including regulations relating to royalties, allowable production, importing and exporting of minerals, and environmental protection, any of which could result in the Corporation not receiving an adequate return on invested capital.

- ***The business of exploration for minerals and mining involves a high degree of risk, as few properties that are explored are ultimately developed into producing mines.***

Mineral exploration is a speculative business, characterized by a number of significant risks including, among other things, unprofitable efforts resulting not only from the failure to discover mineral deposits but from finding mineral deposits which, though present, are insufficient in quantity and quality to return a profit from production. The marketability of minerals acquired or discovered by the Corporation may be affected by numerous factors which are beyond the control of the Corporation and which cannot be accurately predicted, such as market fluctuations, the proximity and capacity of mining facilities, mineral markets and processing equipment, and such other factors as government regulations, including regulations relating to royalties, allowable production, importing and exporting of minerals, and environmental protection, any of which could result in the Corporation not receiving an adequate return on invested capital.

- ***There are significant risks associated with exploration and development activities including industrial accidents, flooding, environmental hazards, technical problems and labour disputes which could materially adversely affect future mining operations and the Corporation's financial position.***

There is no certainty that the expenditures made or to be made by the Corporation in the exploration of its properties will result in discoveries of mineralized material in commercially viable quantities. Most exploration

projects do not result in the discovery of commercially mineable ore deposits. Mining operations generally involve a high degree of risk which even a combination of experience, knowledge and careful evaluation may not be able to overcome. The business of mining is subject to a variety of risks such as industrial accidents, flooding, environmental hazards such as fires, technical failures, labour disputes and other accidents at the mine facilities. Such occurrences, against which the Corporation cannot or may elect not to insure, may delay production, increase production costs or result in liability. The payment of such liabilities may have a material adverse effect on the Corporation's financial position.

- ***Marketability of natural resources which may be discovered by the Corporation will be affected by numerous factors beyond its control.***

The mining industry in general is intensely competitive and there is no assurance that, even if commercial quantities of mineral resources are discovered, a profitable market will exist for the sale of same. Factors beyond the control of the Corporation may affect the marketability of any mineral occurrences discovered. The price of minerals has experienced volatile and significant price movements over short periods of time, and is affected by numerous factors beyond the control of the Corporation, including international economic and political trends, expectations of inflation, currency exchange fluctuations (specifically, the United States dollar relative to the Canadian dollar and other currencies), interest rates and global or regional consumption patterns, speculative activities and increased production due to improved mining and production methods.

- ***If the Corporation's programs are successful, additional funds will be required for the development of an economic ore body and to place it into commercial production.***

The business of mineral exploration and extraction involves a high degree of risk with very few properties that are explored ultimately achieving commercial production. As a mining company in the development stage, the future ability of the Corporation to conduct exploration and development will be affected principally by its ability to raise adequate amounts of capital through equity financings, debt financings, joint venturing of projects and other means. In turn, the Corporation's ability to raise such funding depends in part upon the market's perception of its management and properties, but to a great degree upon the mineral prices and the marketability of securities of speculative exploration and development mining companies.

The development of any ore deposits found on the Corporation's exploration properties depends upon the Corporation's ability to obtain financing through any or all of equity financing, debt financing, the joint venturing of projects, or other means. There is no assurance that the Corporation will be successful in obtaining the required financing.

- ***Title Matters***

In those jurisdictions where the Corporation has property interests, the Corporation makes a search of mining records in accordance with mining industry practices to confirm satisfactory title to properties in which it holds or intends to acquire an interest, but does not obtain title insurance with respect to such properties. The possibility exists that title to one or more of its properties, particularly title to undeveloped properties, might be defective because of errors or omissions in the chain of title, including defects in conveyances and defects in locating or maintaining such claims, or concessions. The ownership and validity of mining claims and concessions are often uncertain and may be contested. There is, however, no guarantee that title to the Corporation's properties and concessions will not be challenged or impugned in the future. The properties may be subject to prior unregistered agreements or transfers, and title may be affected by undetected defects.

- ***The Corporation has a lack of operating history and has no history of earnings.***

The Corporation and its predecessor companies have no history of earnings. The Corporation has paid no dividends on its shares since incorporation and does not anticipate doing so in the foreseeable future. The only present source of funds available to the Corporation is through the sale of its equity shares or by way of debt facilities. While the Corporation may generate additional working capital through the operation, development, sale or possible syndication of its properties, there is no assurance that any such funds will be generated.

- ***Currency risk***

The Corporation is exposed to currency fluctuations in the acquisition of foreign currencies. The Corporation holds balances in cash and cash equivalents, accounts payable, accrued liabilities and convertible debenture in foreign currencies (US dollars) and is therefore exposed to gain or losses on foreign exchange.

- The Corporation's activities on the Pumpkin Hollow Property are subject to environmental regulations.***
 All phases of the Corporation's operations are subject to environmental regulation in the various jurisdictions in which it operates. Environmental legislation is evolving in a manner which will require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and a heightened degree of responsibility for companies and their officers, directors and employees. There is no assurance that future changes in environmental regulation, if any, will not adversely affect the Corporation's operations, or its ability to develop its properties economically. Before production may commence on any property, the Corporation must obtain regulatory and environmental approvals and permits. There is no assurance such approvals and permits will be obtained on a timely basis, if at all. Compliance with environmental and other regulations may reduce profitability, or preclude economic development of a property entirely.
- The Corporation is in competition with other mining companies that have greater resources and experience.***
 The resource industry is intensely competitive in all of its phases, and the Corporation competes with many companies possessing greater financial resources and technical facilities. Competition could adversely affect the Corporation's ability to acquire suitable producing properties or prospects for exploration in the future.
- The Corporation is dependent on key personnel and the absence of any of these individuals could result in a significantly negative effect on the Corporation.***
 The success of the Corporation and its ability to continue to carry on operations is dependent upon its ability to retain the services of certain key personnel. The loss of their services to the Corporation may have a material adverse effect on the Corporation. The Corporation does not presently have "key person" life insurance for any of its officers.
- Some of the directors of the Corporation are involved with other mineral resource companies and may have a conflict of interest in negotiations on a project that is also of interest to the Corporation.***
 Certain of the directors of the Corporation are directors of other mineral resource companies and, to the extent that such other companies may be interested in a project also of interest to the Corporation, or may in the future participate in one or more ventures in which the Corporation participates, such directors may have a conflict of interest in negotiating and concluding terms respecting the extent of such participation. In the event that such a conflict of interest arises, at a meeting of the directors of the Corporation, a director who has such a conflict will abstain from voting for or against the approval of such acquisition or participation. In the appropriate cases, the Corporation will establish a special committee of independent directors to review a matter in which several directors, or management, may have a conflict. From time to time several companies may participate in the acquisition, exploration and development of natural resource properties thereby allowing for their participating in larger programs, permitting involvement in a greater number of programs and reducing financial exposure in respect of any one program.
- Legal Proceedings Against Foreign Directors.***
 The Corporation is incorporated under the laws of British Columbia, Canada, and some of the Corporation's directors and officers are residents of Canada. Consequently, it may be difficult for United States investors to effect service of process within the United States upon the Corporation or upon its directors or officers, or to realize in the United States upon judgments of United States courts predicated upon civil liabilities under the United States Securities Exchange Act of 1934, as amended. Furthermore, it may be difficult for investors to enforce judgments of U.S. courts based on civil liability provisions of the U.S. federal securities laws in a foreign court against the Corporation or any of the Corporation's non-U.S. resident officers or directors.
- Shareholder Dilution***
 It is likely that additional capital required by the Corporation will be raised through the issuance of additional equity securities, resulting in dilution to the Corporation's shareholders.

Changes in Accounting Policy

Accounting standards newly adopted

Effective July 1, 2009, the Corporation adopted new accounting standards as follows:

EIC-174, Mining exploration costs

In March 2009, the CICA issued EIC-174, Mining Exploration Costs. The EIC provides guidance on the accounting and the impairment review of exploration costs. This EIC abstract applies to financial statements issued after March 27, 2009. Adoption of this EIC did not have any effect on the Corporation's financial statements.

Financial Instruments, Disclosure and Presentation

Effective July 1, 2009, the Corporation has adopted the enhanced disclosure requirements of amended CICA Section 3862, Financial Instruments - Disclosures. Refer to note 11 for fair value measurement disclosures using a fair value hierarchy that reflects the significance of the inputs in making the measurements.

Recent Accounting Pronouncements

Adoption of International Financial Reporting Standards

The Canadian Accounting Standards Board has announced that Canadian publicly accountable enterprises will adopt IFRS as issued by the International Accounting Standards Board effective January 1, 2011. The Corporation is in the process of developing a plan for the implementation of IFRS and will assess the impact of the differences in accounting standards on the Corporation's consolidated financial statements. The Corporation expects to make changes to processes and systems before the 2011 fiscal year, in time to enable the Corporation to record transactions under IFRS, including 2010 fiscal period financial statements presented for comparative purposes in the 2011 financial year.

Business Combination

In December 2008, the Accounting Standards Board ("AcSB") issued CICA Handbook Section 1582, Business Combinations, which is converged with International Financial Reporting Standards ("IFRS") 3, Business Combinations, and replaces CICA Handbook Section 1581, Business Combinations. Section 1582 provides guidance on the application of the purchase method of accounting for business combinations. In particular, Section 1582 addresses the determination of the carrying amount of the assets and liabilities of a subsidiary company, goodwill and accounting for a non-controlling interest at the time of the business combination. The new standard is effective on a prospective basis to business combinations for which the acquisition date is on or after January 1, 2011. Earlier application is permitted. If an entity applies this Section before January 1, 2011, it shall also adopt CICA Handbook Section 1601 and CICA Handbook Section 1602. This new standard will only have an impact on the Company's financial statements for future acquisitions if the Company early adopts the standard.

Consolidated Financial Statements and Non-controlling Interests

In December 2008, the AcSB issued CICA Handbook Section 1601, Consolidated Financial Statements, which replaces CICA Handbook Section 1602, Consolidated Financial Statements. Section 1601 establishes standards for the preparation of consolidated financial statements, and applies to interim and annual consolidated financial statements relating to fiscal years beginning on or after January 1, 2011. Earlier adoption is permitted as of the beginning of a fiscal year. An entity adopting CICA Handbook Section 1601 for a fiscal year beginning before January 1, 2011 also must adopt CICA Handbook Section 1582, and CICA Handbook Section 1602.

Non-controlling Interests

In December 2008, the AcSB issued CICA Handbook Section 1602, Non-controlling Interests, which establishes standards for accounting for a non-controlling interest in a subsidiary in consolidated financial statements subsequent to a business combination. Section 1602 applies to interim and annual consolidated financial statements relating to fiscal years beginning on or after January 1, 2011. Earlier adoption is permitted as of the beginning of a fiscal year. An entity adopting CICA Handbook Section 1602 for a fiscal year beginning before January 1, 2011 also must adopt CICA Handbook Section 1582, and CICA Handbook Section 1601.

Outlook

The Corporation will continue to focus the majority of its exploration and development efforts in the United States for purposes of the acquiring, exploring and developing high-grade copper projects.

As a development stage company the future liquidity of the Corporation will be affected principally by the level of its development expenditures and by its ability to raise an adequate level of capital through the capital markets. In management's opinion the Corporation's current working capital position will be sufficient for purposes of completing its current development program at the Pumpkin Hollow property which includes the decision to proceed directly to completion of a Definitive Feasibility Study ("DFS") based on the success of the delineation drilling program and the substantial progress made in feasibility-related engineering studies. The results of current drilling, metallurgical, and geotechnical programs will contribute to the DFS, which will also include an updated resource estimate reflecting the results of the current 2010 drilling program totalling 50,000 meters. The DFS will advance Pumpkin Hollow toward production by building on the results of the two previous Preliminary Economic Assessment studies (previously announced and filed on SEDAR in April 2008 and January 2010) and recent engineering studies. The DFS will also evaluate alternative project development options for the large and high grade copper deposits at Pumpkin Hollow.

The Corporation will continue to evaluate its funding requirements on a going forward basis in an effort to meet its future development and growth initiatives.

Subsequent Event

Subsequent to September 30, 2010 the Corporation granted 610,000 stock purchase options to directors, officers, employees and consultants exercisable at \$3.74 expiring October 13, 2020.

NEVADA COPPER CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In Canadian Dollars)

For the three months ended September 30, 2010 and 2009 (Unaudited – Prepared by Management)

1. NATURE OF OPERATIONS

Nevada Copper Corp. (the “Corporation” or “Nevada Copper”), is an exploration stage mining company engaged in the identification, acquisition and exploration of copper and other mineral properties located in the United States.

Nevada Copper was incorporated on June 16, 1999 under the Business Corporations Act of the Yukon as African Venture Corporation and changed its name to Astron Resources Corporation on July 26, 1999, and subsequently to Nevada Copper Corp. on November 16, 2006. The Corporation’s common shares are listed on the Toronto Stock Exchange (“TSX”) under the NCU symbol.

These consolidated financial statements have been prepared on a going concern basis in accordance with Canadian generally accepted accounting principles. The Corporation will be required to raise additional funding to complete its long-term business objectives. Failure to raise additional funding may require the Corporation to reduce operations.

2. BASIS OF PRESENTATION

These interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles (“Canadian GAAP”) using standards for interim financial statements and do not contain all of the information required for annual financial statements. These statements follow the same accounting policies and methods of application of the most recent annual audited financial statements. Accordingly, they should be read in conjunction with the most recent annual audited financial statements of the Corporation. In the opinion of management, all of the adjustments necessary to fairly present the interim consolidated financial statement have been made.

3. ADOPTION OF NEW ACCOUNTING STANDARDS

Accounting standards newly adopted

Effective July 1, 2009, the Corporation adopted new accounting standards as follows:

EIC-174, Mining exploration costs

In March 2009, the CICA issued EIC-174, Mining Exploration Costs. The EIC provides guidance on the accounting and the impairment review of exploration costs. This EIC abstract applies to financial statements issued after March 27, 2009. Adoption of this EIC did not have any effect on the Corporation’s financial statements.

Financial Instruments, Disclosure and Presentation

Effective July 1, 2009, the Corporation has adopted the enhanced disclosure requirements of amended CICA Section 3862, Financial Instruments - Disclosures. Refer to note 12 for fair value measurement disclosures using a fair value hierarchy that reflects the significance of the inputs in making the measurements.

Recent Accounting Pronouncements

Adoption of International Financial Reporting Standards

The Canadian Accounting Standards Board has announced that Canadian publicly accountable enterprises will adopt IFRS as issued by the International Accounting Standards Board effective January 1, 2011. The Corporation is in the process of developing a plan for the implementation of IFRS and will assess the impact of the differences in accounting standards on the Corporation’s consolidated financial statements. The Corporation expects to make changes to processes and systems before the 2011 fiscal year, in time to enable the Corporation to record transactions under IFRS, including 2010 fiscal period financial statements presented for comparative purposes in the 2011 financial year.

NEVADA COPPER CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In Canadian Dollars)

For the three months ended September 30, 2010 and 2009 (Unaudited – Prepared by Management)

3. CHANGES IN ACCOUNTING POLICIES AND RECENT ACCOUNTING PRONOUNCEMENTS (continued)

Business Combination

In December 2008, the Accounting Standards Board (“AcSB”) issued CICA Handbook Section 1582, Business Combinations, which is converged with International Financial Reporting Standards (“IFRS”) 3, Business Combinations, and replaces CICA Handbook Section 1581, Business Combinations. Section 1582 provides guidance on the application of the purchase method of accounting for business combinations. In particular, Section 1582 addresses the determination of the carrying amount of the assets and liabilities of a subsidiary company, goodwill and accounting for a non-controlling interest at the time of the business combination. The new standard is effective on a prospective basis to business combinations for which the acquisition date is on or after January 1, 2011. Earlier application is permitted. If an entity applies this Section before January 1, 2011, it shall also adopt CICA Handbook Section 1601 and CICA Handbook Section 1602. This new standard will only have an impact on the Corporation’s financial statements for future acquisitions if the Corporation early adopts the standard.

Consolidated Financial Statements and Non-controlling Interests

In December 2008, the AcSB issued CICA Handbook Section 1601, Consolidated Financial Statements, which replaces CICA Handbook Section 1602, Consolidated Financial Statements. Section 1601 establishes standards for the preparation of consolidated financial statements, and applies to interim and annual consolidated financial statements relating to fiscal years beginning on or after January 1, 2011. Earlier adoption is permitted as of the beginning of a fiscal year. An entity adopting CICA Handbook Section 1601 for a fiscal year beginning before January 1, 2011 also must adopt CICA Handbook Section 1582, and CICA Handbook Section 1602.

Non-controlling Interests

In December 2008, the AcSB issued CICA Handbook Section 1602, Non-controlling Interests, which establishes standards for accounting for a non-controlling interest in a subsidiary in consolidated financial statements subsequent to a business combination. Section 1602 applies to interim and annual consolidated financial statements relating to fiscal years beginning on or after January 1, 2011. Earlier adoption is permitted as of the beginning of a fiscal year. An entity adopting CICA Handbook Section 1602 for a fiscal year beginning before January 1, 2011 also must adopt CICA Handbook Section 1582, and CICA Handbook Section 1601.

5. MINERAL PROPERTIES

Pumpkin Hollow Copper Development Property

On December 1, 2005, the Corporation entered into an Option Agreement to acquire a ten-year lease for mining rights (the “Lease”), effective May 4, 2006 and expiring May 4, 2016, to the Pumpkin Hollow Copper Development Property (the “Property”) located in north-western Nevada, United States, approximately one hundred miles southeast of Reno. The Property is located within a contiguous 22 square mile land package comprised of patented and unpatented claims.

NEVADA COPPER CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In Canadian Dollars)

For the three months ended September 30, 2010 and 2009 (Unaudited – Prepared by Management)

5. MINERAL PROPERTIES (continued)

During the 2006 fiscal year, the Corporation paid \$90,722 (US\$80,000) to the optionor in full payment for the option and obtained a 100% interest in the Property pursuant to the lease terms. The Corporation has the option to extend this lease for up to three additional ten-year terms. A small non-core portion of the unpatented claims is subject to an assertion of a prior claim by a third party. The Corporation has taken steps to remedy this matter.

Under the terms of the Lease, the Corporation is required to make the following Lease payments:

Due Date	US\$
May 4, 2007	75,000 (Paid)
May 4, 2008	100,000 (Paid)
May 4, 2009	125,000 (Paid)
May 4, 2010	150,000 (Paid)
May 4, 2011	150,000
	600,000

Following May 4, 2011, the Corporation is required to pay advance royalty payments of US\$600,000 annually until the expiry of the Lease on May 4, 2016. Total advance royalty payments under this obligation are US\$3,000,000.

The Property is subject to a 5% royalty on the net return value of products other than copper, and a sliding scale royalty of 4% to 6% on the net return value of copper based on the copper price per pound. The advance royalty payments are offset against this royalty obligation.

The Corporation is obligated to make exploration and development expenditures on the Property of at least US\$4,000,000 during the first three years of the Lease, with expenditures of at least US\$500,000 each year, and an additional US\$4,000,000 during the 4th through 6th years of the Lease, with expenditures of at least US\$500,000 each year. In 2008, the Corporation satisfied these expenditures obligations.

The Corporation may extend the Lease for up to three additional terms of ten years each, subject to performing continuous mining activities, payment of advance royalty payments of at least US\$3,000,000 in the first ten-year term and payment of production royalties and minimum royalty payments of US\$10,000,000 in each subsequent ten-year term.

Project expenditures capitalized as of September 30, 2010 and June 30, 2010 consisted of the following:

	June 30, 2010	Expenditures	September 30, 2010
	\$	\$	\$
Property payments	936,405	154,858	1,091,263
Water rights	461,682	49,129	510,811

Amortization	124,812	12,100	136,912
Administration	359,929	27,644	387,573
Total	28,251,464	3,281,233	31,532,697

NEVADA COPPER CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In Canadian Dollars)

For the three months ended September 30, 2010 and 2009 (Unaudited – Prepared by Management)

5. MINERAL PROPERTIES (continued)

Pumpkin Hollow Copper Development Property – Water Rights

Pursuant to the First Amendment to the Lease dated April 10, 2008, the Corporation agreed to acquire from the optionor of the Lease, certain water rights to consume a maximum of 724 acre feet of water for its mining operations on the Property in exchange for making 80 quarterly payments of US\$47,262 each payable over a period of 20 years from July 1, 2008 to April 1, 2028. The First Amendment to the Lease also contains provisions allowing the Corporation to accelerate and reduce the payments required.

In August of 2009, the Corporation entered into an agreement with the City of Yerington, Nevada to reserve 2,000 acre feet of water for a term of 30 years. As consideration the Corporation will pay to the City of Yerington annual reservation fees of \$50,000 which revert to user fees based on usage at \$100 per acre foot for year 1 to year 15; \$125 for year 16 to 20; \$150 for year 21 to 25; and \$175 per acre foot for year 26 to year 30.

6. RELATED PARTY TRANSACTIONS

The Corporation shares certain premises and facilities with a company which has certain directors in common, under a cost sharing agreement. During the three months ended September 30, 2010, the Corporation incurred expenses of \$40,500 (2009 - \$34,500).

The Corporation entered into management agreements with certain members of senior management. In the event that there is a change of control, the Corporation is committed to pay severance payments equivalent of one to three years of salary.

Related party transactions are recorded at the amount paid or received as established by contract or as agreed upon by the Corporation and the related party.

7. CONVERTIBLE DEBENTURE

On June 25, 2009, with the approval of the TSX, the Corporation entered into an agreement (the “Agreement”) with Zhongtiao Shan Non-ferrous Metals Group Co., Ltd. (“ZTS”) whereby gross proceeds of USD\$2,000,000 (the “Principal”) were received for issuance of a convertible debenture (the “Convertible Debenture”).

The Convertible Debenture matures on December 25, 2010 (the “Maturity Date”) and bears interest at a rate of 7% per annum calculated monthly and payable in full on the Maturity Date. The Corporation has the option at any time after December 25, 2009 to re-pay the then outstanding amount of the Convertible Debenture plus accrued interest.

The Principal outstanding under the Convertible Debenture is convertible into common shares at a deemed price of CAD\$1.00 per share by ZTS at any time up to the day immediately preceding the Maturity Date. If the Corporation’s common shares trade at a price greater than CAD\$1.35 per share for a period of 20 consecutive trading days, the Corporation may, at its option any time after October 26, 2009 force conversion of the Principal outstanding under the Convertible Debenture in whole or in part into common shares at a deemed price of CAD\$1.00 per share.

The terms of the Convertible Debenture also limit the shares that can be issued under the conversion feature to the number of shares that can be issued on conversion of USD\$2,000,000 using the specified June 25, 2009 US dollar foreign exchange rate, with any additional shares that would otherwise be issuable based on a higher actual foreign exchange rate at the conversion date, to be settled in cash.

The Corporation determined that the convertible debenture contains an embedded derivative in the form of a contractual obligation to deliver a variable number of its own equity instruments because the foreign exchange effect of the conversion feature is uncertain. Accordingly this conversion feature has been treated as a liability and not as an equity instrument. The Corporation estimated the fair value of the debt element using an effective interest rate of 17% which resulted in \$1,978,548 (USD \$1,716,000) being initially recognized as debt, with the balance of \$327,452 (USD\$284,000) being initially recorded as variable conversion feature.

NEVADA COPPER CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In Canadian Dollars)

For the three months ended September 30, 2010 and 2009 (Unaudited – Prepared by Management)

7. CONVERTIBLE DEBENTURE (continued)

The Corporation also determined that the Convertible Debenture contained an embedded derivative related to the cash settlement amount for any additional shares that would otherwise be required to be issued should the conversion date foreign exchange rate exceed the specified June 25, 2009 foreign exchange rate. This element is dependant on an underlying variable not specific to any party to the contract. The Corporation will recognize and record the value of this embedded derivative liability to its fair value at each reporting date. As at September 30, 2010, exchange rates were lower than the specified June 25, 2009 exchange rate, no additional embedded derivative liability was recognized.

The Convertible Debenture is comprised as follows:

	September 30, 2010	June 30, 2010
	\$	\$
Recognized as debt on issue date	1,978,548	1,978,548
Cash debt issuance costs	(104,400)	(104,400)
Warrants granted as issuance cost	(34,400)	(34,400)
Accrued interest	189,994	153,979
Accretion expense	239,728	184,714
Foreign exchange (gain)/loss on translation	(212,784)	(159,114)
	<u>2,056,686</u>	<u>2,019,327</u>

The variable conversion feature is comprised as follows:

	September 30, 2010	June 30, 2010
	\$	\$
Variable conversion feature on issue	327,452	327,452
Foreign exchange (gain)/loss on translation	(34,781)	(24,671)
	<u>292,671</u>	<u>302,781</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In Canadian Dollars)

For the three months ended September 30, 2010 and 2009 (Unaudited – Prepared by Management)

8. SHARE CAPITAL (continued)

Issued (continued)

During the year ended June 30, 2009, the Corporation issued 188,349 common shares for gross proceeds of \$282,416 on share purchase warrants exercised.

During the year ended June 30, 2010, the Corporation issued 265,000 common shares for gross proceeds of \$265,000 on stock options exercised. The Corporation reclassified \$188,565 from contributed surplus to share capital as a result.

On November 3, 2009 the Corporation entered into an investment agreement (the “Agreement”) with Capstone Mining Corp. (“Capstone”) whereby the Corporation issued 4,500,000 units at a price of \$2.50 per unit for gross proceeds of \$11,250,000. Each unit consisted of one common share and one-half of a transferable common share purchase warrant. Each whole warrant is exercisable into one common share at an exercise price of \$3.00 per common share until November 3, 2011. The Corporation has the option to force a conversion within 30 days of a written notice if at any time prior to November 3, 2011 the closing price of the Corporation’s common shares is greater than \$3.50 for at least 20 consecutive trading days. All securities issued in connection with this financing were subject to a four month hold period, expiring March 4, 2010. Share issuance costs totaling \$108,888 were incurred in connection with the financing. No fair value was assigned to warrants attached to the units.

In connection with the Agreement, the Corporation granted Capstone a pre-emptive right to participate in any future share offerings by the Corporation so that Capstone can maintain its ownership percentage of the Corporation as long as Capstone’s ownership interest in the Corporation is above 9%. Exercise of the pre-emptive right is subject to regulatory approval at the time of exercise.

Pursuant to the Agreement, if Capstone maintains an ownership interest in the Corporation of 19% or higher, Capstone will be entitled to nominate a representative to the Board of Directors of The Corporation. In addition, Capstone has agreed not to increase its ownership interest in the Corporation beyond 20% without the prior consent of the Board of Directors of the Corporation.

On April 27, 2010, the Corporation closed a bought-deal private placement whereby 7,762,500 common shares of the Corporation were issued at a price of \$3.05 per share for gross proceeds of \$23,675,625. All securities issued in connection with the offering were subject to a four month hold period expiring August 28, 2010. Professional and regulatory fees totalling \$343,305 were incurred in connection with the financing. The Corporation paid \$1,420,538 cash and issued 465,750 share purchase warrants to an agent as commission. Each warrant is exercisable into one common share of the Corporation at a price of \$3.30 per share until April 27, 2012. Fair value of these agent warrants have been determined using the Black-Scholes option pricing model. For purposes the calculation, the following weighted average assumptions were used in deriving the weighted average grant date fair value of \$1.78 per warrant for a total fair value of \$828,100.

	<u>2009</u>
Risk free interest rate	1.91%
Expected dividend yield	0%
Expected stock price volatility	125%
Expected life in years	2

Options

The Corporation grants incentive stock options as permitted pursuant to the Corporation’s Stock Option Plan (the “Plan”) approved by the shareholders on November 16, 2007 which complies with the rules and policies of the TSX. Under the Plan, the aggregate number of common shares which may be subject to option at any one time may not exceed 10% of the issued common shares of the Corporation as of that date including options granted prior to the adoption of the Plan.

8. SHARE CAPITAL (continued)

Options (continued)

Options granted may not exceed a term of 10 years, and the term will be reduced to one year following the date of death of the optionee. If the Optionee ceases to be qualified to receive options from the Corporation those options shall immediately expire. All options vest when granted unless otherwise specified by the Board of Directors.

As of September 30, 2010 the Corporation has stock options outstanding to directors, officers, employees and consultants and exercisable to acquire an aggregate of 4,334,000 common shares summarized as follows. All of these options vested upon grant. The options have a weighted average remaining life of 5.35 years.

	Number of Options	Weighted Average Exercise Price	Expiry Date
Balance, June 30, 2008	3,205,000	\$1.21

Exercised	(891,000)	\$2.10	
Balance, September 30, 2010	4,334,000	\$1.46	

During the year ended June 30, 2010, 1,445,000 (fiscal year June 2009 – 1,040,000) stock options were granted which resulted in compensation expense of \$2,917,600 (fiscal year, June 2009 - \$1,021,500) being charged to operations. The full amount was related to directors and officers of the Corporation. The Corporation uses the Black-Scholes option pricing model to value stock options which requires management to make estimates that are subjective and may not be representative of actual results. Changes in assumptions can materially affect estimates of fair values. For purposes of the calculation, the following weighted average assumptions were used in deriving the weighted average grant date fair value of \$2.08 (2009 – \$1.51) per option.

	<u>2010</u>	<u>2009</u>
Risk free interest rate	2.65%	3.25%
Expected dividend yield	0%	0%
Expected stock price volatility	119%	80%
Expected life in years	5.0	4.0

11. FINANCIAL INSTRUMENTS

Fair values in the consolidated balance sheet:

The carrying amounts reported in the consolidated balance sheet for short term financial assets and liabilities, which includes cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities approximate fair values due to the immediate or short-term maturities of these financial instruments.

Following is a classification of fair value measurements recognized in the consolidated balance sheet using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

	Fair value measurement at reporting date using:			
	September 30, 2010	Quoted prices in active markets identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets				
Cash and cash equivalents	23,342,126	23,342,126	-	-

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 – Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability.

Level 3 – Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

Cash and cash equivalents are classified as held for trading and therefore are recorded at fair value.

The carrying amounts of marketable securities are equal to fair value, which is based on active market obtained from the closing stock price. Receivables and accounts payables were determined by face value of invoices.

Contractual Obligations

The following table sets forth the Corporation's known contractual obligations as at September 30, 2010:

Contractual Obligations	Payments due by period				
	Total \$	Less than 1 year \$	2-3 years \$	4-5 years \$	More than 5 years \$
Debt Obligations	2,349,357	2,349,357	Nil	Nil	Nil
Lease Obligation – Payment on Pumpkin Hollow Property *	3,150,000	150,000	1,200,000	1,200,000	600,000
Total	\$5,566,262	\$2,566,262	\$1,200,000	\$1,200,000	\$600,000

*Amount in US dollars

11. FINANCIAL INSTRUMENTS (continued)

Financial risk factors

The Corporation manages its exposure to financial risks, including foreign exchange risk and interest rate risk, based on a conservative framework to protect itself against adverse rate movements. All transactions undertaken are to support the Corporation's ongoing business and the Corporation does not acquire or issue derivative financial instruments for trading or speculative purposes. The Corporation's Board of Directors oversees management's risk management practices by setting trading parameters and reporting requirements.

The Corporation's activities are exposed to financial risks: market risk (including currency exchange risk and interest rate risk), credit risk and liquidity risk.

a) Market risks

i) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in market interest rates. Cash and cash equivalents bear interest at market rates. Other current financial assets and liabilities are not exposed to interest rate risk because of their short-term nature and non-interest bearing.

ii) Currency risk

The Corporation is exposed to currency fluctuations in the acquisition of foreign currencies. The Corporation holds balances in cash and cash equivalents, accounts payable and accrued liabilities and convertible debenture in foreign currencies (US dollars) and is therefore exposed to gain or losses on foreign exchange. A significant change in the currency exchange rate between the Canadian dollar relative to the US dollar could have an effect on the Corporation's results of operations, financial position and/or cash flows. The Corporation has not hedged its exposure to currency fluctuations.

As at September 30, 2010, the Corporation had convertible debenture of \$2,000,000 denominated in U.S. dollars. A change in +/- 5% in the USD exchange rate could have an impact of approximately +/- \$100,000 on convertible debenture and variable conversion feature liability.

b) Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Corporation to credit risk consist of cash and cash equivalent. The Corporation has reduced its credit risk by investing its cash and cash equivalents in high quality Canadian and US chartered banks.

c) Liquidity risk

Liquidity risk is the risk that the Corporation will not be able to meet the obligations associated with its financial liabilities. As of September 30, 2010, the Corporation had enough funds available to meet its financial liabilities and future financial liabilities under its current commitments. The Corporation handles liquidity risk through the management of its capital structure.

12. MANAGEMENT OF CAPITAL

The Corporation's objectives of capital management are intended to safeguard the entity's ability to support the Corporation's development and exploration of its mineral properties and support any expansionary plans.

The capital of the Corporation consists of the items included in shareholders' equity and debt obligations net of cash and cash equivalents. The Corporation manages the capital structure and makes adjustments in light of changes in economic conditions and the risk characteristics of the Corporation's underlying assets.

To effectively manage the entity's capital requirements, the Corporation has in place a rigorous planning and budgeting process to help determine the funds required to ensure the Corporation has the appropriate liquidity to meet its objectives. The Corporation may issue new shares or seek debt financing to ensure that there is sufficient working capital to meet its short-term business requirements. The Corporation is not subject to externally imposed capital requirements.

13. SUBSEQUENT EVENT

Subsequent to September 30, 2010 the Corporation granted 610,000 stock purchase options to directors, officers, employees and consultants exercisable at \$3.74 expiring October 13, 2020.
